

Head of Engineering Support **Gareth Cribb**

Gareth has been in the power generation industry for nearly 40 years primarily in the operations, maintenance and engineering fields.

During his career, he has gained experience across different sizes of power plants (biomass, gas & oil, hard coal) from smaller cogeneration plants in refineries and chemical plants to multifuel GW generation sites.

With multidiscipline engineering qualifications and a MBA from Hull University, Gareth is looking forward to utilise his national and

international management experience in working on new build projects, with OEM's & EPC contractors to deliver new energy transition projects and solutions for customers.

As Head of Engineering Support Gareth is leading a multidisciplined engineering and project management team to support delivery of internal projects and to also provide third-party business support.

1 What gives you most satisfaction in your work?

Enabling individuals and teams to reach their full potential in achieving success.

2 Why did you choose RWE TI?

I chose RWE TI to be able to work internationally across a multidiscipline and multitechnology organisation that is responsible for delivering energy transition projects.

3 What three words best describes you?

Enthusiastic - good listener - problem solver

4 „Our aim is your success.“

For me, this message means: Providing commercially aware and expert engineering support to our own internal teams and third-party business, to deliver the desired outcome or solution where needed.
