

Managing Director Technology Solutions & Project Execution **Götz Hanau**

Götz studied industrial engineering at the Technical University of Karlsruhe and the Universities of Uppsala in Sweden and Valencia in Spain.

Götz is an energy specialist with over 20 years of professional experience in trading and generation. At the beginning of his career, he worked for several years in international commodity trading and then moved into various strategy and business development positions in power generation, for which he worked internationally in various RWE companies.

For several years, Götz led the strategy,

innovation and technology development of RWE Generation in varying functions. One focus of his work was on decarbonization and the expansion of the flexible generation portfolio.

As Managing Director “Technical Solutions & Project Execution” at RWE Technology International, Götz is responsible for the technical planning, development and implementation of all RWE asset investments for security of supply and flexibility. He is also in charge of central engineering, project procurement and system and governance development.

1 What gives you most satisfaction in your work?

I love developing technical solutions together with highly qualified and motivated colleagues and implementing them in projects.

2 Why did you choose RWE TI?

RWE Technology International is responsible for realizing RWE's strategic growth and portfolio ambitions in the field of flexible generation. I am very motivated to be able to make a significant contribution to security of supply and climate protection with my job.

3 What three words best describes you?

Interested - team player - goal-oriented

4 “You get your best solution“

What it means to me: The successful implementation of investments requires techno-economically optimized solutions. We deliver and realize these pragmatically with the highly motivated and enthusiastic team of RWE Technology International.
