

Press release

RWE reaches 10 gigawatts owned and operated clean generation assets in the U.S.

- **U.S. growth milestone achieved with the commissioning of two solar farms in California and Georgia with a combined capacity of 290 MW**
- **U.S. market at the core of RWE's strategy to grow its globally diversified generation portfolio**
- **With more than 170 operational facilities in 24 U.S. states, RWE is generating impact in communities across America, fueling economic growth, new employment opportunities and millions in tax revenue**

Austin, 18 December 2024

RWE, a leading global energy company, has reached a significant growth milestone in the U.S. after hitting 10 gigawatts (GW) of installed generation capacity of onshore wind, solar and energy storage facilities in operation from coast to coast.

The company owns and operates a diverse portfolio of more than 170 facilities in 24 U.S. states, including 4.3 GW of solar, 5.2 GW of onshore wind and 0.5 GW of battery storage. Additionally, RWE has more than 4 GW of clean energy projects under construction in the U.S. RWE is present in a majority of U.S. states and continues to rapidly scale its U.S. operating portfolio to deliver on its promise of providing cost-competitive, reliable energy that is also creating economic growth and opportunity in communities across the country.

Andrew Flanagan, Chief Executive Officer, RWE Clean Energy: “By working with top tier suppliers, partnering with local communities and empowering employees, RWE is generating impact across America with clean, domestically produced electricity. We’re fueling economic growth, creating new jobs and providing millions in tax revenues and additional financial benefits to our partners in the community, while also enhancing national energy security.”

In 2024, RWE has commissioned new onshore wind, solar and battery storage facilities with a total combined generation capacity of 953 megawatts (MW). RWE brought online six projects across five different states, all of which are helping to meet the growing energy demand driven by artificial intelligence, data centers, American manufacturing and more. In addition, RWE collaborates closely with local communities as it’s developing projects across the U.S. This includes continuous engagement with communities, providing funding

for local organizations and nonprofits, supporting landowners and contributing property tax income to local municipalities that helps pay for new infrastructure, emergency responders, school funding and more.

Contributing together to RWE's 10 GW milestone are two recently commissioned solar projects in the U.S.: Northern Orchard Solar and Timberland Solar. Northern Orchard is located in Kern County, California, and has an installed capacity of 150 MWac solar energy, with a co-located 92 MW (368 MWh) battery energy storage which will be commissioned during the upcoming months. Timberland Solar is a 140 MWac solar farm in Oglethorpe County, Georgia. Together, the two solar farms can generate enough electricity to power 51,000 average U.S. homes annually.

Supporting RWE's Global Growth Ambitions

As part of its Growing Green strategy, RWE invests billions of dollars in the US to further grow its clean portfolio.

RWE

RWE is leading the way to a clean energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
