

Press release

RWE secures two more onshore wind projects at French regulation latest bidding round

- **RWE has successfully secured two of the 57 projects in the latest bidding round**
- **The Group has secured a total capacity of 41.3 MW**
- **Located in the Nouvelle-Aquitaine and Centre-Val de Loire regions, these two projects will strengthen RWE's presence in these two regions**

Essen, November 14th 2024

The French CRE (Commission for the Regulation of Energy) has published the results for the latest onshore wind bidding round (AO 16), for a selected capacity of 755.22 MW at an average price of 87.92 euros/MWh. RWE has emerged as one of the leading recipient, securing contracts for two projects with a combined capacity of 41.3 MW.

Katja Wünschel, CEO RWE Renewables Europe & Australia: “This new success reflects RWE’s winning approach: making each project exemplary in combining local integration with competitive pricing. These good results reflect our growth in the French market, in line with our Growing Green strategy.”

Two projects enhancing local development

The two wind farms will supply around 33,700 residents with green electricity. Located in the Charente-Maritime department, the Morgat wind farm will feature two turbines with a total installed capacity of 11.8 MW. With five turbines, the Pressoirs wind project in the Indre region will reach an installed capacity of 29.5 MW.

Alongside these two projects, RWE has planned a range of support measures to help integrate the wind farms smoothly into their local environments.

Since its entry into the French market in late 2020, RWE has successfully commissioned 240 MW of renewable energy capacity. The Group is currently developing over 1.4 GW of onshore wind projects and nearly 900 MWp of solar projects. Moreover, RWE is currently participating in all French offshore wind tenders. As a leading figure in the energy transition, the Group is committed to expanding its global green technology capacity to more than 65 GW by 2030. To achieve this ambitious goal, RWE is investing €55 billion worldwide between 2024 and the end of the decade.

RWE

RWE is leading the way to a green energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. Between 2024 and 2030, RWE will invest 55 billion euros worldwide in offshore and onshore wind, solar energy, batteries, flexible generation, and hydrogen projects. By the end of the decade, the company's green portfolio will grow to more than 65 gigawatts of generation capacity, which will be perfectly complemented by global energy trading. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net-zero by 2040. Fully in line with the company's purpose - *Our energy for a sustainable life*.

RWE Renouvelables France

A subsidiary of the RWE, RWE Renouvelables France is one of the leading developers and producers of renewable energies on the French market. With 270 employees throughout France, our teams develop, finance, build and operate wind and solar farms. The Group is currently developing over 1,4 GW of onshore wind projects, 900 MWp of solar projects and has commissioned around 240 MW in 2 years. It is also positioned in all French offshore wind power tenders.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
