

Press release

ENERCON and RWE team up on onshore wind in Europe

- **MoU signed at WindEnergy conference in Copenhagen**
- **Partners plan to jointly realize onshore wind projects in Europe**
- **ENERCON will supply and construct the wind turbines and also take care of servicing**

Copenhagen, 9 April 2025

Onshore wind turbine manufacturer ENERCON and RWE, one of the world's leading renewable energy companies, have agreed on a long-term partnership to jointly realize onshore wind projects in Europe. The companies have signed a Memorandum of Understanding (MoU) at the WindEurope conference to define the terms of their cooperation. The multi-year agreement covers collaboration on projects in most of RWE core markets in Europe. ENERCON will be responsible for the supply, installation and servicing of the wind turbines in line with the principles of RWE's strategy of self-performance.

Katja Wünschel, CEO RWE Renewables Europe & Australia:

“Onshore wind power is a cost-effective way to expand renewable energy. We only implement projects that meet our high return requirements supported by state-of-the-art technology. This is where our partnership with ENERCON comes into play. The aim is to secure supply for a part of our project portfolio on known terms, thereby ensuring the reliable delivery of our growth program and planning certainty for our supply chain partner beyond project-by-project transactions. The MoU is a perfect fit with our existing contractual landscape and will strengthen and diversify our European supply chain further. I am very much looking forward to the projects we will jointly implement across Europe.”

Ulrich Schulze Südhoff, CCO ENERCON:

“Together with RWE, we are pleased to be able to make a long-term contribution to the expansion of onshore wind energy in Europe and thus to a climate-neutral, independent and economical energy supply. With our expanded product and service portfolio, we are capitalising on the opportunities of a changing energy market and offering our customers attractive added value for their projects. The partnership between RWE and ENERCON secures both our long-term plans and the market-driven further development of our products with the aim of successfully shaping the energy transition in Europe.”

ENERCON

As a pioneer in wind energy technology and a partner in the energy transition, ENERCON specialises in the development, production, sales and service of onshore wind energy turbines. With the mission 'Energy for the World', the company has been committed to sustainable energy generation from onshore wind since 1984 and is one of the world's leading manufacturers thanks to innovative turbine technology, high quality standards and a total installed capacity of more than 64 gigawatts.

RWE

RWE is leading the way to a clean energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
