RWE builds wind farm in Mecklenburg-Western Pomerania

- **22.8 megawatt wind farm near Papenhagen to be commissioned in mid-2026**
- **RWE wind farm to supply green electricity for around 20,000 households**

Essen, 23 April 2025

RWE is expanding its onshore wind portfolio in Mecklenburg-Western Pomerania by 22.8 MW. After winning the auction organised by the Federal Network Agency at the end of last year, the company has now started construction work. RWE is building four wind turbines with a total installed capacity of 22.8 megawatts (MW) near Papenhagen, close to the small town of Grimmen in the district of Vorpommern-Rügen. Commissioning is scheduled for mid-2026. Together, they will supply around 20,000 households with green electricity. RWE is building another wind turbine nearby on behalf of a project partner.

Katja Wünschel, CEO RWE Renewables Europa & Australia: “We are continuing to accelerate the expansion of wind energy in Germany and are expanding our wind fleet in Mecklenburg-Western Pomerania. Local communities also benefit. We voluntarily pay 0.2 cents per kilowatt hour produced to local communities. This means an estimated annual income of up to 130,000 euros for the wind farm near Papenhagen.”

Green growth in the domestic market

In addition to its headquarters in Essen, RWE has nine regional offices throughout Germany to ensure a strong presence in the regional wind and solar business. As part of this expansion, the company is currently on the looking for suitable locations for renewable energy plants throughout Germany. Information for interested landowners can be found at www.rwe.com/landverpachten.

RWE

RWE is leading the way to a clean energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.
